FOUNDER'S NOTE

The work behind the name.

I trained as an accountant. In Ukraine, I built and ran an accounting firm and trading operations. That work taught me to pay attention to the details behind a business: how it works, how money moves, and what needs to happen next.

After moving to the United States, I began building from Chicago under BLUEROCK AI GROUP LLC. Today, my work spans digital products, trade, documents and media. I am also an Illinois Notary Public.

This issue brings my own ventures together. Each has a different purpose. I want this portfolio to make those purposes clear, and to open the next conversation.
